Education and Training

2012-15 **Postdoctoral Associate/Fellow** *Department of Pharmacology, University of Vermont*

Explored two aspects of urinary bladder function: (1) the relationship between bladder wall micromotions and sensory nerve outflow; and (2) the regulation of bladder blood flow in health and disease. Mentor: Dr. Mark T. Nelson.

2012 **Ph.D., Pharmacology and Toxicology** *Michigan State University, East Lansing, MI*

Dissertation Title: "Endothelin-1-induced calcium signaling in arteries and veins".

Mentors: Drs. Stephanie Watts and William Jackson

2002 **B.S., Science and Technology Studies** *Lyman Briggs College, Michigan State University*

Positions

2022- **Director and Founder** *MSU Cubi³C, Michigan State University*

MSU Cubi³C is a core facility specifically geared to help scientists imagine new ideas, invent the tools required, and implement these tools to drive cutting-edge scientific discovery. Cubi³C is capable of all aspects of instrument design, fabrication, and validation. Tools include 3D printing, CNC machining, electronics design/fabrication, microcontroller programming, and data collection interfaces. Responsible for all aspects of production, management, maintenance, design, and intellectual property protection.

2019- **Assistant Professor (Tenure Track)** *Department of Pharmacology and Toxicology,
Michigan State University*

Investigate the regulation of bladder vascular tone to uncover how changes in bladder blood flow affect micturition under normal and pathological conditions, specifically type 2 diabetes. Explore the role of transient receptor potential vanilloid type 1 (TRPV1) channels in the onset and development of progressive, stress-induced bladder dysfunction. Uncover the relationship between bladder wall biomechanics and the sensation of bladder fullness. Additional affiliations:

- Neuroscience Program
- Comparative Medicine and Integrative Biology
- Interdisciplinary Pharmacological Sciences Training Program

2015-19 **Assistant Professor (Research Track)** *Department of Pharmacology,
University of Vermont*

Investigate the regulation of bladder vascular tone to uncover how changes in bladder blood flow affect micturition under normal and pathological conditions, specifically type 2 diabetes.

2013-20 **Webmaster** *Leducq Center Against Small Vessel Disease (LCASVD)*

Design, maintain, develop, and implement a comprehensive web presence and technological infrastructure for the LCASVD - a collaboration of more than 20 researchers from three countries - investigating the pathogenesis and treatment of cerebral Small Vessel Disease and related conditions.

Employment Experience

2005 **Donor Recruitment Representative** *American Red Cross*

Responsible for event coordination and promotion for American Red Cross blood drives in six Mid-Michigan Counties, including recruiting donors and sponsor groups. Included all direct-to-consumer marketing, press releases and media contacts, business-to-business sales, donor telerecruiting, and staff/volunteer management.

2004-05 **Admissions Advisor** *Baker College of Owosso*

Responsible for recruitment, enrollment and retention of high school seniors and adults at Baker College's Owosso campus. Included college presentations to prospective students, direct-to-student marketing, and all enrollment and financial aid services.

2002-04 **Professional Sales Representative** *Altana Pharma, Inc.*

Responsible for direct-to-physician sales, route and territory planning, product promotion, sales management, and reporting functions for pharmaceutical products to general/family practice physicians, internal medicine specialists, obstetricians, and gynecologists.

Teaching Experience

Michigan State University (As Faculty)

2023- **Coordinator:** PHM 422: Fundamentals of Neuropharmacology

2022-23 **Coordinator:** PHM 980: Pharmacology of Excitable Cells

2021 **Co-Coordinator:** PHM 829: Neuropharmacology (online; asynchronous)

2019- **Lecturer:** PHM 564: Medical Pharmacology – Cholinergic Pharmacology
 OST 572/PA 873: Genitourinary System Pharmacology – Bladder and Prostate Pharmacology; Renal Toxicology
 VM 568: Urinary System II – Urinary Bladder Pharmacology
 NEU 492: Autonomic Neuroscience – Urinary Bladder Physiology
 PHM 802: Cellular, Molecular and Integrated Systems Pharmacology: Local Anesthetics; General Anesthetics; CNS Stimulants I/II; CNS Depressants I/II; Lower Urinary Tract

University of Vermont

2016-19 **Lecturer:** PHRM 272: Toxicology – Drugs of Abuse I/II

2014-19 **Lecturer:** PHRM 290: Molecular & Cellular Pharmacology –TRP Channels; IP₃ Receptors

2014-17 **Lecturer:** MPBP 301/302: Human Physiology & Pharmacology I/II – Autonomic Physiology; Urinary Bladder Physiology; Ion Channel Physiology

Michigan State University (As Doctoral Candidate)

2011-12 **Teaching Assistant:** PHM 830 – Experimental Design and Analysis
Lecturer: PHM 450 – Introduction to Chemical Toxicology

2010 **Tutor:** PHM 350 – Introduction to Pharmacology

2009 **Teaching Assistant:** PHM 829 – Pharmacokinetics and Pharmacodynamics

Mentoring (HS: High School, UG: Undergraduate, M: Masters, D: Doctoral)**Primary Mentor**

Pending Research Funding

| | | | |
|--|---|-----------------------------|--|
| <u>R01-DK119615 (Renewal)</u> | <i>NIH NIDDK Research Project Grant</i> | <u>5/1/2024 - 4/30/2029</u> | <i>Role: Co-Primary Investigator (20%)</i> |
| The goal of this project is to investigate how TRPV1 channels in sensory nerves and fibroblasts interact with each other to drive the progression of stress-induced bladder dysfunction. | | | |

Current Research Funding

| | | | |
|---|---|-------------------------------|--|
| <u>R01-DK135696</u> | <i>NIH NIDDK Research Project Grant</i> | <u>12/1/2023 - 11/31/2027</u> | <i>Role: Co-Primary Investigator (30%)</i> |
| This project seeks to understand how the mechanical properties of the urinary bladder wall influence sensory outflow to the brain during bladder filling. | | | |
| <u>R01-DK119615</u> | <i>NIH NIDDK Research Project Grant</i> | <u>6/19/2019 - 4/30/2024</u> | <i>Role: Co-Primary Investigator (20%)</i> |
| This project investigates how the duration/intensity of social stress causes bladder dysfunction and determine the role TRPV1 channels play in the progression of stress-induced bladder dysfunction. | | | |
| <u>P01-HL152951</u> | <i>NIH NHLBI Program Project Grant</i> | <u>1/1/2022 - 12/31/2027</u> | <i>Role: Co-Director, Core D (20%)</i> |

This project will determine the roles of perivascular adipose tissue (PVAT) as a central integrator of vascular health.

TL1-DK136046

8/1/2022 – 7/31/2027

*NIH NIDDK Institutional Network Award**Role: Co-Investigator and IAC Member (5%)*

The Kidney, Urology and Hematology (KUH) Research Training Program (U2C/TL1) was developed with the primary goal of recruiting and preparing diverse trainees (predoctoral to physician scientists to PhD postdoctoral fellows) for careers in academics.

P20-DK127554

12/1/2021-11/30/2023

*NIH NIDDK Exploratory Centers for Benign Urology**Role: Co-Investigator (5%)*

This project establishes the Michigan Interdisciplinary Center for Urology Research and Education (MI-CURE). This collaboration between Michigan State University, Oakland University, and Beaumont Hospital, investigates the cause of – and treatments for – underactive bladder.

R01-DK125543

7/1/2020 – 6/30/2025

*NIH NIDDK Research Project Grant**Role: Other Significant Contributor (0%)*

The major goal of this project is to understand how the bladder senses fullness, as this is a key issue to understanding normal bladder function and will provide new insights into bladder pathology.

Completed Research FundingR01-DK119615 (Supplement)

3/1/2021 – 2/28/2023

*NIH NIDDK Research Project Grant Supplement**Role: Mentor/Primary Investigator*

This Administrative Supplement funds the graduate studies of B. Malique Jones, to promote diversity and inclusion in scientific research.

MSU Molecular Discovery Grant

1/1/2022 – 12/31/2022

*Pilot Grant Program**Role: Primary Investigator*

The goal of this pilot project is to develop an assay to test the affinity of compounds for both the MrgprB2 receptor and its human ortholog, the MrgprX2 receptor. These test compounds will then be used as a framework for future development of novel analogs to treat changes in wall compliance that underly LUTS without affecting the ability of the bladder to fully empty.

K01-DK103840

7/1/2015 – 6/30/2021

*NIH NIDDK Mentored Scientist Development Award**Role: Primary Investigator (75%)*

This project investigates how alterations in urinary bladder blood flow and vascular contractility affect bladder function, both normally and in diabetes.

T32-HL007647

8/1/2013 – 7/31/2014

*NIH NHLBI Postdoctoral Cardiovascular Research Training Program**Role: Trainee (100%)*

This project allows postdoctoral trainees to observe how clinicians, basic scientists, engineers, and mathematicians collaborate effectively to gain an understanding of both the normal and diseased states of the cardiovascular system.

Patents

- “Pentaplanar Reflected Image Macroscopy System”. US Patent No. 10,585,270.

Invited Lectures/Seminars

- “Our Friend, the Urothelium: A Regulator of Inflammation and Remodeling”. NIDDK Collaborating for the Advancement of Interdisciplinary Research in Benign Urology (CAIRIBU) Annual Meeting; Kansas City, MO (2023).
- “Get Up and Stretch – Compliance, Remodeling, and the Sensation of Pressure”. *University of Vermont Pharmacology Seminar Series*; Burlington, VT (2023).
- “Get Up and Stretch: Compliance Drives Sensation in the Urinary Bladder”. *NIDDK KUH Summer Undergraduate Research Symposium*; Madison, WI (2023).
- “Get Up and Stretch: How Long Does It Take for Inflammation to Drive Remodeling in the Urinary Bladder?”. *Society for Basic Urological Research Spring Meeting at the American Urological Association Conference*; Chicago, IL (2023).
- “Managing the Transition: Maximizing Success”. *NIDDK K Awardee Workshop*; Bethesda, MD (2023).
- “Managing a Basic Science Team”. *NIDDK K Awardee Workshop*; Bethesda, MD (2023).
- “Navigating Scientific Collaborations”. *NIDDK K Awardee Workshop*; Bethesda, MD (2023).
- “Get Up and Stretch: Compliance, Sensation, and Inflammation in the Urinary Bladder”. *University of Texas Southwestern Urology Grand Rounds*; Dallas, TX (2022).
- “3D Printing, Fabrication and Design for Scientists Part 2: From Idea to Instrument – A Case Study in In-House Instrument Fabrication”. *NIDDK Collaborating for the Advancement of Interdisciplinary Research in Benign Urology (CAIRIBU) Catalyst Conversations*; Virtual (2022).
- “3D Printing, Fabrication and Design for Scientists Part 1: 3D Printing for Smarties (That Know Nothing about 3D Printing)”. *NIDDK Collaborating for the Advancement of Interdisciplinary Research in Benign Urology (CAIRIBU) Catalyst Conversations*; Virtual (2022).
- “Physiology and Pathophysiology of Urinary Bladder Sensory Circuits”. *NIDDK Neuro-urology Think Thank Symposium*; Virtual (2022).
- “Get Up and Stretch: Compliance, Sensation, and Inflammation in the Urinary Bladder”. *University of Pittsburgh Department of Urology Seminar Series*; Pittsburgh, PA (2022).
- “Scientists are to be Seen and Heard: Use of Audio-Visual Equipment (for the sake of) Your

Audience". NIDDK Collaborating for the Advancement of Interdisciplinary Research in Benign Urology (CAIRIBU) ARTICS Community Forum; Virtual (2021).

- “Smooth Muscle Calcium Signaling in Bladder and Prostate”. *O'Brien Center Innovative Idea Incubator (i3) Seminar Series*; Madison, WI (2021).
- “Get Up and Stretch: Compliance, Sensation, and Inflammation in the Urinary Bladder”. *3rd Annual CRepHS Symposium: Determinants of Urogenital Tract Homeostasis in Aging*; St. Louis, MO (2021).
- “When Spice Isn't Nice: TRPV1 Channels as the Linchpin of Progressive Bladder Dysfunction”. *Michigan State University Neuroscience Program Seminar Series*; East Lansing, MI (2020).
- “When Spice Isn't Nice: TRPV1 Channels as the Linchpin of Progressive Bladder Dysfunction”. *University of Tennessee Health Sciences Seminar Series*; Memphis, TN (2020).
- “When Spice Isn't Nice: TRPV1 Channels as the Linchpin of Progressive Bladder Dysfunction”. *5th International Congress on Underactive Bladder (CURE-UAB 5.0) Meeting*; East Lansing, MI (2019).
- “Central Nervous System Integration of Sensory and Motor Function”. NIDDK Collaborating for the Advancement of Interdisciplinary Research in Benign Urology (CAIRIBU) Meeting; Kansas City, MO (2019).
- “When Spice Isn't Nice: TRPV1 Channels in Bladder Physiology and Dysfunction”. *University of Wisconsin O'Brien Center for Benign Urologic Research Seminar Series*; Madison, WI (2019).
- “Communication of Bladder Fullness to the Central Nervous System”. NIDDK Collaborating for the Advancement of Interdisciplinary Research in Benign Urology (CAIRIBU) Meeting; Ellicott City, MD (2018).
- “Going Through the (micro)Motions: Decoding the Sensors of Bladder Fullness”. *Michigan State University Department of Pharmacology and Toxicology Seminar*; East Lansing, MI (2018).
- “Going Through the (micro)Motions: Decoding the Sensors of Bladder Fullness”. *O'Brien Center for Benign Urologic Research Seminar Series*; Madison, WI (2017).
- “Going Through the (micro)Motions: Decoding the Sensors of Bladder Fullness”. *University of Maryland School of Medicine Seminar*; Baltimore, MD (2017).
- “Searching for the Source: Macroscopic Measurement of Calcium Signals and Micromotions in the Mouse Urinary Bladder”. *O'Brien Center for Benign Urologic Research Spring Symposium*; Madison, WI (2017).
- “Into the Void: Why the Science of Going ‘Number One’ is my Priority #1”. *Radio Bean School Lunch Lecture Series*; Burlington, VT (2015).

Webinars and Podcasts

- Tykocki NR and Schosserer M. “How to Manage your Data with an Electronic Lab Notebook – Takeaways from Academia” [Webinar]. Hosted by: SciNote; <https://tinyurl.com/2bfvetu3> (2023).

Conferences and Presentations

- Walker J, Jones BM, **Tykocki NR**. Does compound 48/80 increase urinary bladder smooth muscle contractility to muscarinic agonists? Poster presentation; *Mid-Michigan Symposium for Undergraduate Research Experiences [Mid-SURE]*; East Lansing, MI (2023).
- Fular M, **Tykocki NR**, Roccabianca S. Novel force transducer for biaxial biomechanical characterization of murine arteries. Poster presentation; *Mid-Michigan Symposium for Undergraduate Research Experiences [Mid-SURE]*; East Lansing, MI (2023).
- Benton C, Vega Rodrigues OJ, **Tykocki NR**. Does compound 48/80 affect the functions of matrix metalloproteinases? Poster presentation; *Mid-Michigan Symposium for Undergraduate Research Experiences [Mid-SURE]*; East Lansing, MI (2023).
- Jones BM, Mingin GC, **Tykocki NR**. Social stress causes the emergence of functional Histamine H3 Receptors in urinary bladder smooth muscle. Poster Presentation, *American Society of Pharmacology and Experimental Therapeutics Conference*; St. Louis, MO (2023).
- Saxena P, Roccabianca R, **Tykocki NR**. Compound 48/80 increases bladder wall mechanical compliance via activation of MMP-2. Poster Presentation, *American Society of Pharmacology and Experimental Therapeutics Conference*; St. Louis, MO (2023).
- Saxena P, Roccabianca R, **Tykocki NR**. Alteration in Mechanical Compliance via Mast Cell Activation in Juvenile and Adult Urinary Bladder. Poster Presentation, *American Physiological Society Summit*; Long Beach, CA (2023).
- Jones BM, Mingin GC, **Tykocki NR**. The urothelium drives changes to urinary bladder smooth muscle contractility that mimic neurogenic inflammatory signaling. Poster and Podium Presentation, *American Physiological Society Summit*; Long Beach, CA (2023).
- Saxena P, Roccabianca R, **Tykocki NR**. Compound 48/80 increases bladder wall mechanical compliance via activation of MMP-2. Poster Presentation, *American Society for Pharmacology and Experimental Therapeutics Annual Meeting*; Saint Louis, MO (2023).
- Jones BM, Mingin GC, **Tykocki NR**. Social stress causes the emergence of functional Histamine H3 Receptors in urinary bladder smooth muscle. Poster and Podium Presentation, *American Society for Pharmacology and Experimental Therapeutics Annual Meeting*; Saint Louis, MO (2023).
- Jones BM, Mingin GC, **Tykocki NR**. The urothelium drives changes to contractility that mimic neurogenic inflammatory signaling. Podium Presentation; *CAIRIBU: Collaborating for the Advancement of Interdisciplinary Research in Benign Urology Annual meeting*; Bethesda, MD (2022).
- Saxena P, Roccabianca S, **Tykocki NR**. Mechanism of increased detrusor contractility induced by mast cell activator compound 48/80 in murine urinary bladder. Podium Presentation; *CAIRIBU: Collaborating for the Advancement of Interdisciplinary Research in Benign Urology Annual meeting*; Bethesda, MD (2022).
- Broemer E, Saxena P, **Tykocki NR**, Zwaans B, Chancellor M, Bartalone S, Roccabianca S. Mechanical Characterization of Murine Bladder During 3D ex vivo Filling. Poster Presentation; *Society for Basic Urological Research Annual Meeting*; Virtual (2022).
- Saxena P, Roccabianca S, Zwaans B, Chancellor M, Bartalone S, Ward E, **Tykocki NR**. Bladder Wall Biomechanics Differ between Male and Female Mice Poster Presentation; *Society for Basic Urological Research Annual Meeting*; Virtual (2022).

- Jones BM, Mingin GC, **Tykocki NR**. The basic secretagogue compound 48/80 causes urothelium dependent phasic urinary bladder smooth muscle contractions independent of mast cell activation. Poster Presentation; *International Continence Society Annual Conference*; Vienna, Austria (2022).
- Saxena P, Roccabianca S, **Tykocki NR**. Mechanism of Increased Detrusor Contractility Induced by Mast Cell Activator Compound 48/80 in Murine Urinary Bladder. Poster Presentation; *International Continence Society Annual Conference*; Vienna, Austria (2022).
- Jones BM, Mingin GC, **Tykocki NR**. Social Stress Upregulates Histamine H3 Receptor mRNA in Murine Urinary Bladder Smooth Muscle. Poster Presentation; *Experimental Biology Conference*; Philadelphia, PA (2022).
- Saxena P, Roccabianca S, **Tykocki NR**. Compound 48/80 increases bladder wall compliance independent of mast cells. Poster Presentation; *Experimental Biology Conference*; Philadelphia, PA (2022).
- Laumet G, Inyang KE, Evans CM, Heussner M, Petroff M, Reimers M, **Tykocki NR**, Vermeer PD, Folger JK. Head and Neck Cancer-derived Small Extracellular Vesicles Activate TRPV1⁺ neurons to Mediate Cancer. Poster Presentation; *Experimental Biology Conference*; Philadelphia, PA (2022).
- Jones BM, Mingin GC, **Tykocki NR**. Contraction and desensitization to histamine require cholesterol in urinary bladder smooth muscle. Oral Presentation; *MSU Alliances for Graduate Education and the Professoriate Student Success Conference*; Virtual (2021).
- Saxena P, Roccabianca S, **Tykocki NR**. Calculation and analysis of bladder wall biomechanics during ex vivo filling. Poster Presentation; *MSU Alliances for Graduate Education and the Professoriate Student Success Conference*; Virtual (2021).
- Jones BM, Mingin GC, **Tykocki NR**. Contraction and desensitization to histamine require cholesterol in urinary bladder smooth muscle. Poster Presentation; *Society for Basic Urological Research Annual Meeting*; Virtual (2021).
- Saxena P, Roccabianca S, **Tykocki NR**. Calculation and analysis of bladder wall biomechanics during ex vivo filling. Poster Presentation; *Society for Basic Urological Research Annual Meeting*; Virtual (2021).
- Vega Rodríguez OJ, **Tykocki NR**. Histamine causes endothelium-independent dilation of mouse bladder feeder arterioles. Poster Presentation; *Experimental Biology Conference*; Virtual (2021).
- Saxena P, Roccabianca S, **Tykocki NR**. The mast cell activator Compound 48/80 causes phasic urinary bladder causes phasic urinary bladder smooth muscle contractions independent of histamine. Poster Presentation; *Experimental Biology Conference*; Virtual (2021).
- Jones BM, Mingin GC, **Tykocki NR**. The mast cell activator Compound 48/80 causes phasic urinary bladder causes phasic urinary bladder smooth muscle contractions independent of histamine release. Poster Presentation; *Experimental Biology Conference*; Virtual (2021).
